

Painful Nerves
 affect the feet and extremities
 of up to 70% of those with
 blood sugar issues.

According to the American Diabetes Association, 60-70% of those with blood sugar issues are affected by some degree of nervous system damage. Burning, numbness, discomfort, and loss of sensation in the extremities isn't just inconvenient - it can cause real problems.

One of the most overlooked ways to help people maintain the health of their nerves is with nutritional supplementation. For example, when your body starves for B vitamins, you lose the myelin sheath that protects your nerve cells. It is as if they are stripped of their skin, and they get touchy and painful. As this process continues, your nerves can begin to short-circuit and eventually die.

Neuro-Betic is an all-natural nutritional supplement. This exclusive formula promotes and encourages the body's ability to maintain a healthy nervous system with optimal functioning.

Pain and numbness are not inevitable. **Neuro-Betic** is the most advanced and comprehensive product of its kind on the market. Each ingredient was meticulously selected for maximum synergistic effect. No other product comes close to the range and potency of the 11 "neuro-supportive" ingredients combined into one complete formula.

Supplement Facts

Serving Size: 3 Capsules
 Servings Per Container: 30

	Amount Per Serving	% Daily Value
Thiamin (as Benfotiamine)	30 mg	2,500%
