

Natural Choice Menopause Formula

Nutritional Support for the Natural Transition of Menopause

Menopause is a normal, natural event-defined as the end of menstrual periods. The menopause transition lasts approximately 4 years and begins at 47.5 years of age, on average, for American women.

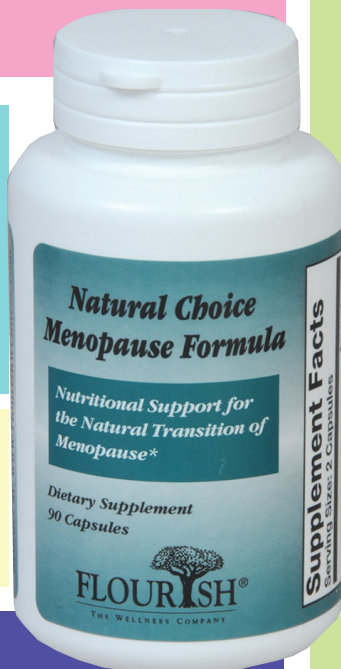

A woman's general health and stress level can have a positive or negative impact on how smooth or difficult this transition can be. Women may be affected by hot flashes, mood swings and sleeplessness.

Effective help is available to ease this transition by providing nutritional support to balance and regulate feminine hormone levels. Our **Natural Choice Menopause Formula** contains 8 natural ingredients that include **Black Cohosh Extract, Red Clover Extract, Dong Quai, Licorice** and **Vitex** to regulate hormonal levels, **Soy Isoflavones** to support bone health, **Damiana** to promote relaxation and support a positive mood and **L-Theanine** to relieve everyday stress and tension.*

Recommendations:

For women, take one capsule twice daily preferably with a meal or as otherwise directed by your healthcare professional. Not for use by pregnant or nursing women.

Regulates Feminine Hormonal Balance

THE PMS TIMES 10 IS GONE!

I began going through menopause last year and wanted to deal with the **hot flashes, mood swings**, etc. in a natural way. The person who said that menopause is PMS times 10 really knew what they were talking about. I went to the health food store and bought a highly advertised product for menopause. It helped with the hot flashes somewhat, but I still felt sluggish, out of sorts, bloated and irritable. I felt there had to be something better. I've been using your **Natural Choice Menopause Formula** for several months and I've got to tell you that it's **everything you promised**. My husband said that he should send you a thank you card for giving him back his fun-loving wife.**
